

Elberton Granite Association Certified Memorial Program

An EGA Certified Memorial is guaranteed against any defects in workmanship or materials by the Elberton Granite Association, Inc of Elberton, GA.

The EGA is the largest trade association of granite quarries and manufacturers in the United States.

Carefully checked throughout every step of production, an independent, quality-control inspector verifies that the material and workmanship of every Certified Memorial meets the most demanding standards of quality in the industry.

To receive the EGA written guarantee of quality, each certified memorial must meet specific standards related to material, workmanship and design.

Material: Fabricated from top-grade granite as determined by established industry standards.

Workmanship: Performed to meet rigorous inspection of specific dimensions, finishing of all surfaces and quality of carving and lettering.

Design: Completed in well proportioned symmetry.

The Elberton Granite Association guarantee is available on any memorial manufactured by a Member-Firm. The guarantee offers to correct or replace free of charge any certified memorial or a defective part of a certified memorial if the defects are due to material or workmanship of the granite.

The EGA Certified Memorial Program has been in place since 1964. Certificates of guarantee are issued on more than 1,500 memorials each year. Every certificate is registered and maintained in a permanent file. The program is supported by the Membership of the Elberton Granite Association, Inc.
